

C.L.O.S.

CONTACT LENS ORDERING SYSTEM

Standard Operating Procedures & Complete Staff Training Manual

PAL OPTICAL • LEXINGTON, KY | VERSION 1.0 (2026) | LAYMAN & STAFF EDITION

Software System:	**Contact Lens Ordering System (C.L.O.S.)**
Organization:	**Pal Optical Co.**
Principal Author:	**James Brentlinger, A.B.O.C., N.C.L.E.C.**
Clinical Oversight:	**Dr. Robbins, Optometrist**
Target Audience:	**Front Desk Reception, Opticians, Doctor Station**
Access URL:	**http://localhost:5174/ (or local office network)**

Pal Optical Proprietary Internal Documentation

This manual provides clear, illustrated, step-by-step guidance for managing daily contact lens intake, doctor prescription entry, 50-row waiting tracking, drawer dispensing, and staff security authorization.

📑 Table of Contents

1. Welcome to C.L.O.S. & System Overview — Ch. 1
Purpose, core philosophy, and high-speed workflow benefits.

2. Starting the Program & Login Portal — Ch. 2
1-click desktop launch, role presets, and the 1.5-second animated splash screen.

3. Daily Orders Pad (16-Row Landscape Form) — Ch. 3
Rapid patient intake, quantity chips, billing tags, allowance calculator & sending batches.

4. Doctor's Ordering Station & Rx Queue — Ch. 4
Dr. Robbins' Rx station, OD/OS inputs, brand presets, and routing to Waiting sheet.

5. The 50-Row Waiting to be Picked Up Sheet & Security Rules — Ch. 5
What front desk staff can edit freely vs. when the Doctor Password is required.

6. Patient Pickup & Checkout Workflow — Ch. 6
Step-by-step patient handoff: recording pickup date and payment method.

7. Visual Dispensing Drawer Rack (Drawers 1–12) — Ch. 7
Locating contacts in office drawers instantly and 1-click checkout.

8. Search Past Order History — Ch. 8
Finding past patients, looking up old prescriptions, and status filters.

9. Precision Printing (Daily Pad & Waiting Sheet) — Ch. 9
Printing completed sheets and 100% blank office pad replicas.

10. Multi-Computer Sync, Backups & Troubleshooting — Ch. 10
Office LAN sync, downloading JSON backups, Excel CSV export, and FAQ.

⭐ **Appendix: Front Desk "Laminated Cheat Sheet"** — App.
Single-page desk summary for instant daily reference.

💡 **The 30-Second Rule for Reception Staff**

Taking a patient's contact lens order takes only 3 clicks: type their name, click their box quantity, click their insurance, and click **+ Add to Pad**. The system automatically formats their phone number and birthdate.

🔒 **Doctor Security Rule Summary**

Front desk staff can ALWAYS mark *how a patient paid* and *the date they picked up* without any password. Modifying prescriptions, patient names, drawer numbers, or deleting orders requires the Doctor's Password (`pal`).

Chapter 1: Welcome to C.L.O.S. & System Overview

The **Contact Lens Ordering System (C.L.O.S.)** was engineered specifically for **Pal Optical** to replace messy physical paper tracking with a lightning-fast, multi-computer digital system that exactly mirrors our real-world office paperwork.

Why C.L.O.S. Exists

In our optical practice, contact lens orders move through three distinct phases across multiple staff members:

1 Phase 1: Front Desk Intake (The 16-Row Daily Pad)

When patients call or visit to order contacts, the front desk collects their name, birthdate, phone number, box quantities, and insurance allowance notes. These accumulate throughout the day on the 16-row pad.

2 Phase 2: Doctor Prescription & Ordering (The Doctor Queue)

Dr. Robbins reviews the orders on her computer, enters the verified contact lens prescription (OD/OS power, cylinder, axis, base curve, diameter, and brand), places the order with the supplier, and sends the order forward.

3 Phase 3: Package Arrival & Patient Pickup (The 50-Row Waiting Sheet)

When boxes arrive from distributors, they are checked in, placed in numbered drawers (1–12), and patients are called. When the patient arrives, the front desk checks them out, records how they paid, and logs the pickup date.

Key Benefits Over Old Paper Sheets

- **Zero Lost Orders:** Everything is stored safely in the database and saved automatically every second.
- **Multi-Computer Synchronization:** Front desk computers and Dr. Robbins' station communicate seamlessly across the office local network in real-time.
- **Exact Paper Replicas:** If you ever need physical paper, the Print button creates an exact 1-to-1 landscape replica of our original 16-row order pad and 50-row tracking sheet.
- **Instant Search:** Find any patient by name, phone number, brand, or drawer number in under 1 second.

Chapter 2: Starting the Program & Login Portal

How to Launch C.L.O.S.

Starting C.L.O.S. in the morning takes just one double-click:

Option A: The 1-Click Desktop Launcher

Double-click the file named **Start C.L.O.S..bat** on your computer. It starts the local server and automatically pops open the software in your web browser.

Option B: In Any Web Browser

Type **http://localhost:5174/** into Chrome, Edge, or Firefox. Other computers on the office Wi-Fi can connect using the office network IP address (e.g. `http://192.168.4.51:5174/`).

The 1.5-Second Animated Splash Screen

Whenever C.L.O.S. starts up, an eye-catching 1.5-second animation plays on the screen:

- Features the custom **C.L.O.S.** optical logo with pupil aperture rotation and cyan laser sweeps.
- Displays James Brentlinger's credentials (A.B.O.C., N.C.L.E.C.) and Pal Optical branding.
- Smoothly counts from 0% to 100% in exactly 1.5 seconds while connecting to the database.
- **Skip Button:** You can click "Skip ⚡" at the bottom right to jump straight to the app immediately.
- **Intro Replay:** You can replay this animation anytime by clicking the ✨ **Intro** button in the top header.

Signing In with Station Role Presets

The login window offers convenient 1-click role buttons designed for busy staff:

ROLE PRESET	USERNAME	PASSWORD	INTENDED STATION & PERMISSIONS
👩‍💼 **Front Desk**	`pal`	`pal`	Front reception desk. Can enter daily orders, log patient pickups, and update payment status freely.
🩺 **Dr. Robbins**	`doctor`	`pal`	Dr. Robbins' examination room. Full access to write prescriptions, order lenses, and edit all records.
🔬 **Optician Lab**	`optician`	`pal`	Optical lab and dispensing area. Access to order history and drawer management.

> 💡 **"Keep Station Signed In" Checkbox:**
> Leave this box checked so your computer stays signed in throughout the business day, even if you close and reopen the browser.

Chapter 3: Daily Contact Lens Orders Pad (16 Rows)

The **Daily Orders Pad** tab (📋) is where front desk staff record incoming contact lens orders throughout the day. It matches the physical 16-row paper pad used at Pal Optical.

How to Add a Patient in 15 Seconds (Quick-Add Bar)

Instead of manually typing into small table cells, use the **Quick Add Patient Order** dock at the top of the screen:

1 Enter Patient Information

Type the patient's name into **Patient Name**. Enter their birthdate into **DOB** (the system automatically formats slashes like `04/15/1985`). Type their phone number into **Phone** (automatically formats as `(859) 555-0199`).

2 Click Quantity Pre-Fill Chips

Click one of the pre-set box chips to instantly fill the quantity field: `1 Box` `1 Box Each` `Six Month Supply` `Annual Supply`. You can also change the number spinner (e.g. 2) and click "2 Boxes Each".

3 Select Billing / Insurance Type

Click the patient's insurance or billing method: `Self Pay` `Eyemed` `VSP` `Spectera` `Versant` `Premier Vision`. It immediately appends the billing label to the instructions column.

4 Special Instructions & Insurance Allowance Calculator

Check the box **"Add Special Instructions / Allowance Details for Doctor"** to open quick allowance presets: *"Only $50 allowance left from original $250"* or *"Dr. Robbins trial fit only"*. You can also type custom dollar amounts.

5 Click "+ Add to Pad"

Click the blue **+ Add to Pad** button. The patient is instantly placed into the next empty row on the 16-row pad, and your inputs clear ready for the next patient.

Individual Row Actions

Each row on the daily pad has helpful action buttons in the rightmost column (omitted during printing):

- 🗑️ **Clear Row:** Erases that specific row with one click. If the row was already sent to the Doctor's Queue, C.L.O.S. will ask if you also want to remove it from the doctor's station.
- 🖍️ **Edit Order:** If the row has been processed, clicking the pencil lets you view and edit full order details.
- **Direct Cell Typing:** You can also click directly into any cell on the 16 rows and type directly, just like on paper.

Sending Orders to Dr. Robbins

When you have entered orders and are ready for Dr. Robbins to write the prescription and place the order with distributors, click the green button:

`Send Batch to Doctor (X Orders)`

All filled rows are instantly transmitted across the office network to Dr. Robbins' screen.

Chapter 4: Doctor's Ordering Station & Rx Queue

The **Doctor's Ordering Queue** tab (🩺) is Dr. Robbins' command center. When the front desk enters orders, they appear here organized as individual cards awaiting clinical review and supplier ordering.

Step-by-Step: How Dr. Robbins Orders Contacts

1 Review the Order Card

Each card displays the patient's name, birthdate, phone number, box quantities requested, and any front-desk insurance allowance notes (e.g. *"VSP: Only $130 allowance left"*).

2 Click "Order Contacts & Enter Rx"

Clicking the blue button opens the **Doctor Prescription & Order Entry Modal**.

3 Select or Type the Contact Lens Brand

Click any quick-brand chip to fill the brand instantly: `Biofinity Multifocals (trials)` `Air Optix Astig` `Oasys Multi` `Ultra Astig` `Acuvue 2` `Dailies Total 1`, or type any custom brand name.

4 Enter Right (OD) & Left (OS) Prescriptions

Type the Sphere, Cylinder, Axis, Add, or Base Curve into the **Rx (Right)** and **Rx (Left)** fields.
Time-Saver Tip: If both eyes share the same prescription, click the ⇄ **Copy Right Eye to Left Eye** button to duplicate the parameters in one click.

5 Add Dispensing / Fitting Notes

Select quick doctor notes that print directly under the patient's name on office sheets: `"CAN TAKE AND TRY"` `*NEEDS FITTING. WILL OWE $50*` `DONT CALL` `*FIT SCHEDULED*`.

6 Set Amount Due & Paid Status

Click `trials` (for complimentary diagnostic pairs) or click pre-set amounts like `$130.00` or `$220.00`.

7 Click "✅ Mark as Ordered & Send to Waiting Sheet"

Clicking the green button submits the order. The system marks it as ordered with today's timestamp, removes it from the doctor's pending queue, and **automatically adds the patient to the 50-row Waiting to be Picked Up Sheet**.

Chapter 5: The 50-Row Waiting Sheet & Security Rules

The **Waiting to be Picked Up** tab (📦) displays the master 50-row landscape tracking sheet matching the physical clipboard and drawer tracking system at Pal Optical.

Columns on the 50-Row Sheet

COL #	COLUMN NAME	PURPOSE & DESCRIPTION	SECURITY PERMISSION
1	**Date Ordered**	Date Dr. Robbins ordered the lenses with supplier.	🔒 Doctor Only
2	**Patient Name & Notes**	Full patient name and doctor dispensing notes.	🔒 Doctor Only
3	**Phone Number**	Primary contact phone for arrival notification.	🔒 Doctor Only
4	**CL Brand**	Brand, lens type, and trial status.	🔒 Doctor Only
5–8	**Rx OD / OS & Qty**	Prescription parameters for Right and Left eyes.	🔒 Doctor Only
9	**Amt Due**	Amount patient owes at pickup (e.g. $130, trials).	🔒 Doctor Only
10	**Pd? (How Paid)**	Payment status or method (Paid, Cash, Card, VSP).	🟢 Staff Unlocked
11	**Date Received**	Date distributor delivered the package to office.	🔒 Doctor Only
12	**Drawer #**	Dispensing drawer number (Drawers 1–12).	🔒 Doctor Only
13	**Date Called**	Date staff called patient or left voicemail.	🔒 Doctor Only
14	**Actions / Pickup**	Checkout button (✓ Done), Edit (🖍️), Delete (🗑️).	🟢 Pickup Unlocked

The Doctor Security Rule

To protect clinical accuracy and medical prescriptions, C.L.O.S. enforces a strict separation of permissions:

1. WHAT FRONT DESK STAFF CAN DO FREELY (NO PASSWORD):

•
How They Paid:
Type directly into the
Pd?
column or change payment method anytime.
•
Date They Picked Up:
Click
✓ Done
on the sheet or
✅ Picked Up
in the drawer rack to check out the patient and record the pickup date.

2. WHAT REQUIRES THE DOCTOR'S PASSWORD (`pal`):

• Clicking
🖍️ Edit Order
to change patient name, prescriptions, brands, quantities, or notes.
• Clicking
🗑️ Delete Order
to permanently delete an order from the database.
• Manually changing arrival dates, assigning drawers, or modifying phone call logs.
• Clicking
Clear All Orders
to empty the waiting sheet.

Chapter 6: Patient Pickup & Checkout Workflow

When a patient walks into Pal Optical to pick up their contact lenses, any front desk staff member can complete their checkout in under 10 seconds without needing any password.

Step-by-Step Checkout Guide for Front Desk

1 Find the Patient on the 50-Row Sheet or Drawer Rack

Scan down the **Waiting to be Picked Up** sheet or open the 🗄️ **Drawer Rack**. Check the **Drawer #** column to know which drawer their lenses are sitting in.

2 Click the "✓ Done" Button

Click the green ✓ **Done** button on their row (or click ✅ **Picked Up** inside the Drawer Rack). The **Patient Contact Pickup Modal** will instantly appear on your screen.

3 Confirm Date Picked Up

The **Date Patient Picked Up** field automatically fills with today's date (e.g. `10/25/2026`). If the patient picked up yesterday, you can change this date.

4 Confirm How They Paid

The modal shows the patient's payment status. Click one of the quick payment chips: `Paid` `Cash` `Card` `Check` `VSP` `Eyemed` `Self Pay`.

5 Click "✅ Confirm Pickup & Archive"

Clicking the green confirmation button completes the checkout:

- The patient is removed from the active 50-row Waiting Sheet.
- Their drawer is marked empty and ready for the next patient.
- The order is permanently archived in **Search Past Order History** for future reference.

Practical Office Scenarios

SCENARIO	WHAT STAFF DOES	PASSWORD REQUIRED?
Patient pays $130 cash at front desk	Click ✓ `Done`, click `Cash`, and click `Confirm Pickup`.	`NO (Unlocked)`
Patient wants to know if their order arrived	Check the `Date Received` and `Drawer #` columns on the 50-row sheet.	`NO (View Only)`
Patient claims phone number is wrong	Click 🖍️ `Edit`, enter Doctor's Password (`pal`), and update phone.	`YES (Doctor Pass)`
Doctor cancelled order; need to delete	Click 🗑️ `Delete`, enter Doctor's Password (`pal`), and confirm deletion.	`YES (Doctor Pass)`

Chapter 7: Visual Dispensing Drawer Rack (Drawers 1–12)

The 🗄️ **Drawer Rack** provides a live visual map of Pal Optical's physical contact lens storage drawers. To open it, click the 🗄️ **Drawer Rack** button on the top executive header.

How the Drawer Rack Works

- **12 Numbered Drawer Cards:** Corresponds to physical Drawers 1 through 12 in the dispensary.
- **In Transit / No Drawer Card:** Shows packages that Dr. Robbins ordered but have not yet been assigned to a physical drawer.
- **Patient Cards Inside Drawers:** Each drawer card displays the patient's name, brand, phone number, arrival date, and call status.
- **Live Badge Count:** Displays how many boxes or patient packages are currently inside each drawer (e.g. `2 Boxes`). Drawers with packages light up in sky blue.

1-Click Drawer Actions

1-Click "✅ Picked Up" Checkout

When a patient arrives, you don't even need to switch back to the table. Click the green ✅ **Picked Up** button directly inside their drawer card to open the checkout modal and dispense their lenses immediately.

"🔒 Log Called" (Requires Doctor Password)

Clicking 🔒 **Log Called** prompts for the Doctor's Password (`pal`) and records today's date in the phone call log.

Chapter 8: Search Past Order History

The **Search Past Order History** tab (🔍) allows you to search across every contact lens order ever entered into C.L.O.S., including active and completed pickups.

How to Search for Past Orders

Type in the Multi-Field Search Bar

Type any part of a patient's name, phone number, date of birth, contact lens brand, or drawer number into the search box. Results filter in real-time as you type.

Quick Filter Buttons

Click any filter pill to narrow down your search results:

- `All Orders`: Shows every order in the database.
- `Awaiting Doctor`: Shows orders still waiting for Dr. Robbins to enter the Rx.
- `Ordered / In Transit`: Lenses ordered with distributor, waiting for delivery.

- `Waiting for Pickup`: Contacts currently sitting in office drawers.
- `Completed Pickups`: Lenses that have already been picked up by patients.

Chapter 9: Precision Printing (Daily Pad & Waiting Sheet)

C.L.O.S. includes professional landscape print styles engineered to produce exact 1-to-1 physical replicas of Pal Optical's original paper forms on standard 8.5" x 11" Letter paper.

Printing the 16-Row Daily Orders Pad

🖨️ Print Completed Daily Sheet

On the **Daily Orders Pad** tab, click the blue button **Print Completed Sheet**. It formats all filled patient rows into a crisp landscape pad ready for filing.

📄 Print 100% Blank Pad Template

Click **Print Blank Pad** to generate a clean, completely empty 16-row pad template for handwriting if computers or power are ever offline.

Printing the 50-Row Waiting to be Picked Up Sheet

📋 Print Waiting Tracking Sheet

On the **Waiting to be Picked Up** tab, click **Print Waiting Sheet**. It prints all 50 numbered rows with patient names, doctor notes, prescriptions, drawer numbers, and call logs.

> 💡 **Zero Digital Clutter on Paper:**
> All on-screen buttons (🖍️ `Edit`, 🗑️ `Delete`, ✓ `Done`, `Clear`, and top navigation bars) are automatically stripped out when printing. Your paper sheets look 100% clean and professional.

Chapter 10: Multi-Computer Sync, Backups & FAQ

How Office Synchronization Works

C.L.O.S. uses a hybrid synchronization engine designed for doctor offices:

- **Instant Cross-Tab Sync:** If two browser tabs or windows are open on the same computer, changes sync across them in milliseconds.
- **Multi-Computer LAN Sync:** When the background server is active, computers in Dr. Robbins' room and the front desk automatically sync over the local network every 10 seconds.
- **Sync Status Dot:** The green pulse dot in the navigation bar indicates when your screen is synchronized with the office network.

Data Backups & Excel Export

At the top right of the executive header, three powerful data tools are available:

BUTTON	WHAT IT DOES	WHEN TO USE IT
💾 **Backup**	Downloads a complete JSON backup file (`pal-clos-backup-[date].json`).	Recommended once a week or before major office holidays.
📊 **CSV**	Exports all orders as an Excel-compatible spreadsheet (`.csv`).	Use for office inventory auditing or year-end financial reporting.
📥 **Restore**	Lets you select a previously downloaded backup file to restore all orders.	Use if a computer was replaced or data was accidentally erased.

Frequently Asked Questions & Troubleshooting

Q1 "I made a typo in a patient's name on the Waiting Sheet. How do I fix it?"

Click the 🖍️ **Edit** button on their row. The system will prompt for the Doctor's Password (`pal`). Type `pal`, click Authorize, and the full Order Modal will open where you can fix the name, phone number, prescription, or any other field. Click 💾 **Save Order Changes** when done.

Q2 "A patient picked up their contacts. Do I need the doctor's password to check them out?"

No! Front desk staff can check out patients without any password. Simply click the green ✓ **Done** button on their row (or ✅ **Picked Up** in the Drawer Rack), verify the date, choose how they paid (e.g. *Paid, Cash, VSP*), and click Confirm.

Q3 "How do I scroll down the 50-row Waiting Sheet on a laptop?"

Use your mouse scroll wheel or trackpad swipe. As you scroll down through rows 1 to 50, the column headers stick permanently to the top of the screen so you always know which column is Date, Patient, Phone, Brand, Rx, Drawer, or Called.

Q4 "What happens if our computer loses internet connection?"

C.L.O.S. runs locally on our office computer network and is configured as a Progressive Web App (PWA). It functions completely offline and saves all data directly to your local computer drive without needing external internet access.

Q5 "What is the Doctor's Password if the doctor is not at the desk?"

The Doctor's Security Password is `pal` (all lowercase, no spaces).

⭐ Appendix: Front Desk "Laminated Cheat Sheet"

Keep this single page printed and taped near the reception workstation for instant daily reference.

📋 Taking a New Order (16-Row Pad)

- 1. Type **Patient Name** in Quick Add bar.
- 2. Type **DOB** (slashes add automatically).
- 3. Type **Phone** (area code formats automatically).
- 4. Click Box Quantity chip (e.g. `1 Box Each`).
- 5. Click Billing chip (e.g. `VSP` or `Self Pay`).
- 6. Click blue **+ Add to Pad** button.
- 7. At end of shift, click 🩺 **Send Batch to Doctor**.

📦 Checking Out a Patient (Pickup)

- 1. Find patient on **50-Row Waiting Sheet** or **Drawer Rack**.
- 2. Note their **Drawer #** to retrieve physical package.
- 3. Click green ✓ **Done** (or ✅ **Picked Up**).
- 4. Check **Date Picked Up** (defaults to today).
- 5. Click payment chip (`Paid`, `Cash`, `Card`, `VSP`).
- 6. Click ✅ **Confirm Pickup & Archive**.
- ⭐ *NO DOCTOR PASSWORD NEEDED!*

🔒 When Doctor Password is Needed

- • Clicking 🖍️ **Edit Order** to modify name, Rx, or brand.
- • Clicking 🗑️ **Delete Order** to erase a waiting order.
- • Changing **Date Received** or **Drawer #** on table.
- • Clicking **Clear All Orders** on waiting sheet.
- • **Doctor Password is:** `pal`

🖨️ Daily Printing Rules

- • **Print Daily Orders:** Click `Print Completed Sheet` on daily tab.
- • **Print Blank Pad:** Click `Print Blank Pad` for paper backup.
- • **Print Waiting Sheet:** Click `Print Waiting Sheet` on waiting tab.
- • **Paper Size:** Always set printer to **Letter Landscape**.
- • Action buttons (🖍️, 🗑️) are hidden on paper automatically.
